LinkedIn: <http://linkedin.com/in/imrankhanpattan> | Github: <https://github.com/imran4792>

OVERVIEW

Entry-level Java Full Stack Developer skilled in building scalable web applications using Spring Boot, REST APIs, and SQL. Strong foundation in backend development, database design, and deployment practices.

Key Achievements:

1. Developed and deployed a full-stack flight booking application with secure authentication and booking workflow
2. Implemented role-based access control and optimized database queries for improved performance
3. Set up CI/CD pipeline using Jenkins and containerized application with Docker
4. Applied best practices in clean code, validation, and exception handling

Career

Focus:

Seeking to start a professional career as a Java Full Stack Developer, contributing to scalable and secure applications while continuously improving development and problem-solving skills.

TECHNICAL SKILLS

- Languages: Java (Core Java, Java 8+, Familiar with Java 21), SQL
- Backend: Spring Boot, REST APIs, Microservices Architecture (Basics)
- Frontend: HTML, CSS
- Databases: MySQL, Oracle SQL, MongoDB
- Tools: Maven, Hibernate, Spring Data JPA, Git, VS Code, Eclipse
- Cloud & DevOps: AWS (EC2, S3 basic), Docker, Jenkins, CI/CD Pipeline, Deployment
- Concepts: OOP, SDLC, Exception Handling, Debugging, Testing, Clean Code

PROJECTS

Flight Booking Application | Full Stack Project

Git: <https://github.com/imran4792/FlightBook.git> | website: <https://flightbook-imran.mooo.com>

Technologies: Java, Spring Boot, MySQL, Thymeleaf, Spring Security, Maven, Spring Data JPA, Apache Tomcat, Docker, Jenkins, Git, REST APIs, Postman, AWS (EC2, S3, IAM, VPC), Linux (Ubuntu), Nginx, SSL/HTTPS

1. Developed a full-stack flight booking system with authentication, flight search, seat selection, and booking management
2. Implemented secure login and role-based access control using Spring Security
3. Designed RESTful APIs and integrated Spring Data JPA for efficient database operations using Mysql
4. Built dynamic UI using Thymeleaf and implemented complete booking workflow (search → select → confirm)
5. Used Apache Tomcat (localhost:8080) for local development, testing, and deployment
6. Containerized the application using Docker for consistent build and runtime environments
7. Implemented CI/CD pipeline using Jenkins to automate build, test, and deployment processes
8. Deployed on Amazon Web Services (EC2) with configured VPC, Security Groups, IAM, and HTTPS for secure and scalable production deployment
9. Followed clean code practices, performed debugging and testing, and designed scalable, production-ready backend services

INTERNSHIPS

Full Stack Java Developer Internship Project

1. Developed and integrated backend services using Java and Spring Boot with frontend components to deliver end-to-end functionality
2. Designed and implemented REST APIs, improving data flow and overall application performance through debugging and optimization
3. Contributed across the full SDLC including development, testing, and deployment of the application

EDUCATION

B.Tech in Computer Science Engineering (2022 – 2026)
Krishna Chaitanya Institute of Technology & Sciences, JNTU Kakinada
CGPA: 8.0/10

Secondary School Certificate (2018 – 2019)
Sri Sai Balaji High School
CGPA: 9.2/10

CERTIFICATIONS

- Full Stack Java-Based Web Development – Elivate (2024)
- DevOps with Azure – Wipro (2024)
